Professional Summary

Software Engineer experienced in developing, deploying, and supporting enterprise web applications and healthcare information systems. Strong background in PHP, JavaScript, Microsoft SQL Server, MySQL, REST APIs, and systems integration. Hands-on experience with Windows Server, IIS, network infrastructure deployment, production support, and client implementations. Recognized for solving complex technical issues, optimizing SQL performance, collaborating with stakeholders, and delivering reliable software solutions. Currently expanding expertise in Microsoft Power Platform and process automation.

Core Competencies

- Full-Stack Web Development (PHP, JavaScript, HTML5, CSS3, Bootstrap)
- Microsoft SQL Server & MySQL Database Development
- REST API Development & Integration
- SQL Query Optimization & Database Design
- Healthcare Information Systems (HIS / RIS / PACS)
- System Integration & Software Deployment
- Windows Server Administration & IIS Configuration
- Remote Support (Remote Desktop & AnyDesk)
- LAN Cable Termination (RJ45), Structured Cabling & Cable Management
- Network Switch & Data Cabinet Installation
- Debugging, Root Cause Analysis & Production Support
- Technical Documentation & SDLC
- Git Version Control

Professional Experience

Software Engineer / Web Developer | Medicotek, Inc.

August 2023 – Present

- Develop and maintain web-based healthcare applications supporting hospital operations.
- Design, maintain, and optimize Microsoft SQL Server and MySQL databases for performance and reliability.
- Develop backend business logic, REST APIs, and responsive user interfaces.
- Implement new features from business requirements while ensuring maintainable and scalable code.
- Enhance billing, reporting, and workflow modules for healthcare systems.
- Deploy applications to Windows Server using Internet Information Services (IIS).
- Provide production support, investigate software defects, and deliver timely resolutions.
- Perform remote troubleshooting using Remote Desktop and AnyDesk.

- Support on-site deployments involving structured cabling, LAN cable termination, switch installation, and data cabinet installation.
- Prepare technical documentation and collaborate with users, management, and technical teams.

Selected Projects

- Hospital Information System enhancements and workflow improvements.
- Multi-modality medical reporting modules (X-ray, CT, MRI, Mammography, Ultrasound).
- Database migration, SQL optimization, and performance tuning.
- College Online Enrollment System.
- Basic Education Online Enrollment System.

Education

Bachelor of Science in Computer Science
St. Francis of Assisi College (2019–2023)

Senior High School – General Academic Strand
University of Perpetual Help (2017–2019)

Technical Tools

- Visual Studio Code
- SQL Server Management Studio
- XAMPP
- Git
- Canva
- Adobe Photoshop
- Adobe Premiere Pro

Professional Strengths

- Analytical problem-solving
- Excellent stakeholder communication
- Fast learner and adaptable
- Team collaboration
- Attention to detail
- Time and project management
